VMoney Web - Release Factsheet

Release Date/Time: 07 July 2015

VMoney Web for VMOs and Delegates

Version 1.1.0

URL: **https://vmoney.cit.health.nsw.gov.au**

A new version of the VMoney Web application was released on 26 June 2015, which contains some minor changes in functionality and appearance. The changes are necessary for technical reasons and should reduce dependency on the end user's internet connection speed. The new VMoney Web application will be accessible via URL https://vmoney.cit.health.nsw.gov.au

Based on feedback we have noted that VMoney Web is being accessed from home and from within some LHDs using Internet Explorer version 8. Microsoft supports the following Internet Explorer versions on windows desktop operating environments.

Windows desktop operating systems	Internet Explorer version
Windows Vista SP2	Internet Explorer 9
Windows 7 SP1	Internet Explorer 11
Windows 8.1 Update	Internet Explorer 11

Due to technical limitations in testing VMoney Web on Internet Explorer 8, we recommend users at home and within the LHDs upgrade to the supported version of Internet Explorer based on the Microsoft support matrix above and VMoney Web technical requirements factsheet attached.

Please note that it is imperative to verify that you have a supported operating system and browser version prior to accessing the new VMoney Web application on https://vmoney.cit.health.nsw.gov.au

Users who are not able to upgrade to Internet Explorer 9 or above in an acceptable time period, the older version of VMoney Web is accessible via URL https://vwcz.cit.health.nsw.gov.au/VMoneyWeb from within NSW local health facilities. However, technical support will be limited.

Recommendation for users who access VMoney Web outside of NSW local health facilities is to upgrade their browsers as per the technical requirements fact sheet.

Please contact VMoney support desk on 1300 883 962 for assistance.
